- Strong attention to detail and organisation
- Team collaboration and cross-functional coordination
- Clinical assistance and procedure support

ADDITIONAL STRENGTHS

- Proficient in health information systems and digital records
- Strong understanding of patient privacy and healthcare protocols
- Comfortable analysing and presenting data for decision-making

PROFILE

MBBS-qualified healthcare professional with over 5 years of clinical experience in hospital settings, currently pursuing a Master's in Business Informatics (Healthcare Informatics) in Auckland. Coursework spans information systems analysis and design, database management, health analytics, digital healthcare design, and data safety in healthcare systems, complemented by hands-on experience with MySQL, Figma, Power BI, and Google Colab through applied group and individual projects. Combines strong clinical background with growing information-systems and data skills to support health informatics, data/analytics, or IT project coordination roles. Seeking an internship where clinical insight and information-systems training can contribute to patient-data quality, system design, and healthcare project delivery.

WORK EXPERIENCE

MEDICAL OFFICER (BANGLADESH)

IBCHK (Healthcare Setting) October 2020 – Jan 2026

- Communicated clearly with patients regarding treatments, follow-ups, and care plans
- Collaborated with nurses and medical staff to ensure smooth daily operations
- Handled high-pressure situations while maintaining professionalism and accuracy
- Maintained accurate and confidential patient records and clinical documentation
- Assisted in clinical procedures and patient care with multidisciplinary teams
- Provided direct patient care in both inpatient and outpatient departments

RETAIL SHOP ASSISTANT

Auckland, New Zealand, June 2026 – Present

- Assisted customers daily, providing friendly and professional service
- Handled transactions accurately and managed cash/eftpos payments
- Responded to customer enquiries and resolved issues efficiently
- Maintained store organisation, stock levels, and cleanliness
- Worked in a fast-paced environment while managing multiple tasks
- Built strong communication skills when dealing with diverse customers

ACADEMIC & GROUP PROJECTS

- Designed and normalised a relational database in MySQL for a healthcare-records case study as part of Database Management Systems coursework
- Produced low- and high-fidelity Figma prototypes for a digital health service concept, applying UX/UI principles from Digital Healthcare Design
- Built interactive Power BI dashboards to analyse and present health-related datasets for Health Analytics coursework
- Used Python in Google Colab for data cleaning and exploratory analysis on group data-analytics assignments
- Collaborated in cross-functional student teams to deliver an IT project plan, applying Agile/PM principles from IT Project Management
- Contributed to a strategic information-systems proposal, applying frameworks from Strategic Information Systems Planning
