## EDUCATION

### Masters of Business Informatics- Healthcare Informatics

Yoobee College, Auckland | 2026-2027

#### Relevant coursework:

- Digital Healthcare Design
- Information Systems Analysis & Design
- Health Analytics
- Database Management Systems
- Data Safety in Healthcare Systems
- Strategic Information Systems Planning
- IT Project Management
- Research Methods

### Bachelor's in Medicine, Bachelor's in Surgery (MBBS)

## TECHNICAL SKILLS

- Power BI – dashboards & data visualisation
- Python (Google Colab) – data analysis
- MySQL – database design & querying

## CORE SKILLS

- Team collaboration and cross-functional coordination
- Confidentiality and healthcare compliance
- Strong attention to detail and organisation
- Clinical assistance and procedure support

## ADDITIONAL STRENGTHS

- Proficient in health information systems and digital records
- Comfortable analysing and presenting data for decision-making
- Strong understanding of patient privacy and healthcare protocols

## PROFILE

MBBS-qualified healthcare professional with 5+ years of clinical experience, now pursuing a Master's in Business Informatics (Healthcare Informatics) with a focus on healthcare UX and digital system design. Combines clinical workflow knowledge with hands-on experience in Figma prototyping, health data analysis, and database design to translate clinical needs into user-friendly, patient-centred digital solutions. Seeking an internship in healthcare design or digital health to improve usability, efficiency, and patient outcomes.

## DESIGN & INFORMATION PROJECTS

### Figma | Digital Health Service & Prototype

- Designed low- and high-fidelity healthcare app prototypes
- Improved usability and navigation using UX principles
- Streamlined patient task flows for faster interaction

### MySQL | Healthcare Database Design

- Built and normalised a relational database for patient records
- Improved data accuracy and retrieval efficiency
- Structured scalable, query-efficient data models

### Power BI | Healthcare Data Dashboard

- Developed interactive dashboards for healthcare data
- Visualised key metrics for clinical and operational use
- Delivered clear, actionable insights from complex data

### Python (Google Colab) | Healthcare Data Analysis

- Cleaned and analysed healthcare datasets in Python
- Identified trends to support data-driven decisions
- Applied basic statistical analysis for insight generation

## WORK EXPERIENCE

### MEDICAL OFFICER (BANGLADESH)

IBCHK (Healthcare Setting) | October 2020 – Jan 2026

- Provided direct patient care in inpatient and outpatient settings, communicating clearly with patients on treatments, follow-ups, and care plans
- Collaborated with nurses and multidisciplinary teams to support clinical procedures and smooth daily operations
- Maintained accurate, confidential patient records and clinical documentation
- Handled high-pressure situations with professionalism and accuracy

### RETAIL SHOP ASSISTANT

Auckland, New Zealand, June 2026 – Present

- Delivered friendly, professional customer service and resolved enquiries/issues efficiently in a fast-paced environment
- Handled cash/EFTPOS transactions accurately while managing multiple tasks
- Maintained store organisation, stock levels, and cleanliness
- Built strong communication skills working with a diverse customer base
